

Bc. Hynek Spurný

Student of the Department of Production

I am a third-year student of Film Production at the Film and TV School of AMU. While still a student of the Palacký University in Olomouc, where I graduated with a bachelor's degree in Film Science and German Philology, I started working in film festival production. I used to organise a student short film festival for three years and worked as the head of the team for Academia Film Olomouc. As a student of FAMU I have been focusing full-time on producing animated, feature and documentary films. Since my second year, I have been pursuing my student project under the guidance of film producer Jaromír Kallista. In addition to studying, I also work in the production of audiovisual projects in both private and public sectors.

I run for the membership in the Academic Senate of AMU because I want to be involved in promoting and defending suggestions from our Faculty's academic community on the level of AMU. I want to help make the AS an authority that, in addition to the basic agenda, strongly facilitates various activities encouraging activities between the Faculties, in effect forming a more stable academic environment. I consider it vital to focus on addressing the impact of the pandemic on the activities of FAMU International as soon as possible, since this Department accounts for a crucial part of the entire Faculty's financial income. My vision for how the Senate should work is based on an empathetic approach to dialogue, openness and cooperation between the affiliated Faculties. This goes hand in hand with consistent respect and pursuit of academic freedoms and values.
