

Jakub Philipp

I am 23 years old and I am a third-year student of a bachelor programme at the Department of Arts Management of DAMU. In my spare time, I work as a boy scout instructor and I write and perform LARP games along with the Rolling association and other creative groups. I have already been at (D)AMU for some time, so I want to offer my alma mater my energy and ideas. By the same token, I realise the importance of the Academic Senate for the functioning of the university and I do not take my candidationship lightly. I want to participate in the operation of the institution and create an environment that will be pleasant for students as well as both academic and non-academic employees.

My programme priorities are based primarily on the 'coalition declaration' made together with my colleagues and friends, Adina Hanáková and Josef Tajovský. My priorities are connecting the Faculties, room for communication, supporting technologies, overcoming the crisis and flawless presentation. We will publish all information regarding the individual points and our other views and priorities on our Facebook site [here](#) and in our Instagram account [@spolamu](#).

That's because we are #TogetheratAMU #spolamu and #Wearehumans.
