

Josef Tajovský

I salute all my colleagues at DAMU!

I am a third-year student of bachelor studies at the Department of Arts Management and, in addition to studying, I conduct business in the fields of culture, catering and information technology. My interests include live cultural events, spending time with friends, walking outdoors and our dog Bedla that I like to take on long walks.

In almost three years of studying at AMU, I have observed several small shortcomings that I believe this school suffers from, and so I decided along with my friends and colleagues Adina Hanáková and Jakub Philipp from our Department to set up the Společně na AMU (Together at AMU) platform, an integral part of the coalition with which we have decided to run for the Academic Senate and change things. We do this for the sake of our own studies as well as for the sake of studies of our current and future colleagues, whom we would like to involve in the self-government process and inform them about the developments at AMU.

This is why we have introduced our Five Programme Priorities, which include connecting the Faculties, room for communication, supporting technologies, overcoming the crisis and flawless presentation. We will continue detailing the points and informing the members of the academic community about the developments at AMU and the approaching election on our Facebook site [here](#) and in our Instagram account [@spolamu](#).

That's because we are #TogetheratAMU #spolamu and #Wearehumans.
